Mode of Delivery: **Online**

Executive Certificate In Ministry

The programme philosophy for the Executive Certificate in Ministry emphasizes the integration of theological knowledge, managerial capability, and practical skills. This holistic approach is designed to prepare students to become effective, compassionate, and spiritually grounded ministers who can serve the needs of their communities with excellence and integrity.

Eastwood Anaba
President, EAM

Theological Foundations:
The programme's core is a commitment to theological depth and rigour. Students will engage in biblical and theological study, exploring the richness and complexity of the Christian tradition. This foundation is essential to developing a robust understanding of ministry and its role in the world.

Rosemond Anaba
Vice President, EAM

Practical Skills: In addition to theological study, the program emphasizes the development of practical ministry skills.

Students will gain experience in preaching, teaching, pastoral care, administration, and other ministry areas. This practical training is designed to prepare students for the challenges of ministry in the real world.
